
Environmental Policy

June 2024

At Simcona Electronics of Canada Inc, we are committed to minimizing our environmental impact in addition to promoting sustainable practices in our daily operations. We recognize the importance of protecting our environment for ourselves and future generations, we strive to be responsible in achieving this.

1. Reducing waste – Simcona Electronics of Canada Inc has implemented landfill reduction strategies and recycling programs to minimize our impact
2. Energy efficiency – Continuously strive to improve efficiencies in our facility, recently we have upgraded our HVAC system, installed energy efficient windows and have converted all office and warehouse lighting to low energy consumption LED products
3. Sustainable Sourcing – Prioritize sourcing products from manufactures who follow our practices and ethical standards
4. Employee Engagement – Educate and engage our employees in new environmental initiatives showing ways we can all make a difference.

By following this policy Simcona Electronics of Canada Inc and its employees aim to contribute to a healthier planet, while setting an example for others to create a more sustainable future.
